

Jewish Power Launch Push To Make Anti-Semitism Global Crime

-High Priest Mageson 666

The Jews simply want to strip you of your rights to criticize them for being worthless Kike bastards, farted right out of the pages of the Talmud into real life. Because acting like a decent person is beyond the nature of the Jew. They have to pretend decent people who point out what evil bastards Jews are.....Simply by pointing to what Jews do to everyone else. Are horrible people that need to be purged by the.....errmmm. Sorry that was so 1920, Soviet Russia. You know that place were Anti-Semitism was made the literal death penalty. By all those Jewish People running the Communist Party. And never stopped running it either.

Israel Launches Initiative to Have Anti-Semitism Recognized as an International Crime

Attorney Alan Baker, Israel's former ambassador to Canada and a legal adviser to the Foreign Ministry wants anti-Semitism to be treated as an international crime. In a new Israeli initiative, Baker is proposing that international courts be used to combat global hate crimes

against Jews.

Baker has drafted an international convention calling on the "Prevention and Punishment of the Crime of Anti-Semitism." The Convention, which is drafted in the manner of classical international anti-terrorism treaties and those for other crimes, will allow countries to cooperate and exchange information with others, in order to extradite those suspected of acts that meet the definition of anti-Semitism, Israel's NRG reported in Wednesday.

"We need to set down clear rules on what constitutes anti-Semitism and to set up international codes to prevent it. We expect that the initiative will be thoroughly discussed among all entities and countries that are engaging anti-Semitism on a global scale," said Baker.

Explaining the need for the Convention, Baker noted that, "everyone knows to condemn anti-Semitism, but they are not doing what is necessary in order to fight against it on an international legal level." He added that, "on the other hand, international courts invite people from around the world to account for various crimes. We think that this is precisely the place to also work decisively and unambiguously against anti-Semitism."

The Jerusalem Center for Public Affairs, where Mr. Baker is now a fellow, intends to release a draft of the Convention, during a series of conferences at the United Nations, to other international organizations, international capitals, and among Jewish communities and organizations around the world.

This will be done in order to encourage countries to support the initiative and to submit a draft of the Convention to the appropriate UN organizations, in order to obtain international approval of the Convention.

Baker said that, "if the world really wants to work against this terrible phenomenon, the time has come to line up behind the measures that are necessary to be employed against it."
